## Technical Skills

---

**Languages and Frameworks:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, Bootstrap

**Databases:** MySQL, MongoDB

**Other Skills:** Teamwork, problem-solving

## Experience

---

### Scalefull Technologies

January 2024 – Present

*Intern Full Stack Web Developer*

*Pune, India*

- I collaborated closely with designers and back-end developers to create seamless web applications, focusing on enhancing user experience and optimizing performance.
- I utilized frameworks like Bootstrap to build scalable, mobile-friendly websites and ensured cross-browser compatibility.
- Optimized the user interface for increased responsiveness, achieving an improved user experience for customers.

### TechnoHacks Technologies

June 2023 - July 2023

*Intern Front-End Developer*

- Successfully debugged the web-related issues, leading to improved efficiency and performance
- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.
- Collaborated closely with senior developers to debug issues and implement new features.

## Personal Projects

---

### Course Registration System | *React.js, CSS, JavaScript, SpringBoot, Java*

- Developed to streamline the course registration process for student. Leveraging React.js for the frontend and Spring Boot to implement backend RESTful APIs, this project provides an efficient solution for student to manage their courses.
- Users can log in, browse available courses, and add them to their personal bucket. Meanwhile, administrative users have the privilege to log in, add and delete courses, ensuring dynamic content management.
- This initiative involved the implementation of user-friendly features, streamlining the process for efficient registration and providing management capabilities.

### Student Practical Assessment Platform | *PHP, React.js, HTML, CSS, JavaScript, MYSQL*

- The Online Assessment System is a feature-rich web application designed for conducting exams in College or any instances where MCQ and Practical exams are applicable.
- The system consists of two parts: the Student Panel and the Admin Panel. Developed using HTML, CSS, JavaScript, PHP and MySQL.
- In this we are provided a Code Editor for practical using React.js and Vite. Student can practice the computer languages and also show to faculty./
- This initiative involved the implementation of user-friendly features, streamlining the process for efficient registration and providing management capabilities.

## Education

---

### Padmabhooshan Vasantraodada Patil Institute of Technology

Jul 2021 – 2024

*Bachelor of Computer Science and Technology*

*Budhgoan, Maharashtra*

### Sharad Institute of Technology and Polytechnic

Jul 2018 – 2021

*Diploma in Computer Science and Technology Percentage - 89.31*

*Yadav, Maharashtra*
